Stores Covered

Prepared by: Junior Analytics Team | FashionWave HQ, Mumbai

PROJECT OBJECTIVES

Increase Weekend Sales

Achieve +15% growth in weekend revenue by Q2 2025 through targeted campaigns, events, and loyalty programs.

Improve Profitability

Identify and address underperforming product lines across 50 stores. Target Shoes margin uplift toward 42%.

Optimize Discounting

Redesign discount strategy to protect margins. High-discount (>25%) transactions show only 24.1% margin vs 46% at no discount.

KEY KPIs TRACKED: Total Sales Revenue • Average Order Value (AOV) • Profit Margin % • Units Sold • Discount Impact • Weekend vs Weekday Ratio

Business Scenario

FashionWave operates 50 stores across India and has observed stagnant weekend sales alongside consistent weekday performance. This report analyzes two years of transaction data (Jan 2023 - Dec 2024) covering Clothing, Accessories, and Shoes to identify revenue drivers, evaluate discount strategy, flag underperforming stores, and recommend a customer segmentation approach.

Assumptions: Only the last two years of transaction data were available. Promotional discounts are capped at 30% by company policy. Seasonal effects from festivals and holidays are assumed to influence sales volume.

EXECUTIVE DASHBOARD

₹19.85 Cr Total Revenue (2Y)	₹7.59 Cr Total Profit (2Y)	38.2% Avg Profit Margin	₹2,647 Avg Order Value	75K Total Transactions	125K Units Sold
--	--	---	--	--	---------------------------------------

Payment Mode Mix

Card 45%

Digital 35%

Cash 20%

50 Stores • 3 Categories • Jan 2023 - Dec 2024

Payment Mode Share (by Revenue)

Q1: PRODUCT CATEGORY PERFORMANCE

Clothing Leads Revenue

Contributes ₹11.04 Cr (55.6% of total) with strong unit volume at 69,382 units.

Accessories Highest Margin

50.1% profit margin - best in class. Scale this category with new SKUs and online bundles.

Shoes: Revenue vs Margin Gap

₹6.08 Cr revenue but only 34.3% margin. Review supplier costs and reduce deep discounting.

Units sold: Clothing 69,382 • Accessories 31,182 • Shoes 24,875

Q2: WEEKEND VS WEEKDAY SALES

	Weekdays	Weekends
Revenue	₹16.27 Cr	₹3.58 Cr
Share of Total	81.9%	18.1%
Avg Revenue / Day	₹3.1L	₹1.7L

45% GAP in average daily revenue between weekdays and weekends

Key Observations & Recommendations

- Weekends generate only 18.1% of revenue despite being ~28% of days - a clear revenue-per-day shortfall.
- Original finding: weekend's share of revenue barely moves between festive months (18.3%) and the rest of the year (17.9%). The Oct-Dec surge is driven almost entirely by extra weekday volume, not more weekend spending - festive campaigns are not yet converting into weekend footfall specifically.
- Weekend visitors skew toward window shoppers; target with "Weekend Exclusive" pricing and loyalty double-points to convert them into buyers.
- Push mobile notifications Thursday-Friday for weekend deals. Digital payments show strong growth - leverage for app-exclusive weekend offers.

MONTHLY REVENUE TREND

Peak Month

2024-10: ₹1.45 Cr - the strongest single month in the dataset.

Seasonal Pattern

Oct-Dec festive surge (Navratri, Dussehra, Diwali, Christmas) consistently outperforms the rest of the year.

Seasonal Insight: The Oct-Dec festive window drives a clear step-up in monthly revenue across both years. Jan-Mar and mid-monsoon (Jul-Aug) are consistently the weakest periods - good windows for clearance promotions.

Q3: IMPACT OF DISCOUNTING ON MARGINS

Revenue & Margin by Discount Tier

Discount Tier	Transactions	Profit Margin
No Discount	15,108	46%
Low (1-15%)	29,003	41.9%
Mid (16-25%)	19,425	32.1%
High (26-30%)	11,464	24.1%

Original finding: Shoes discounts deepen the most during the festive window - from 11.4% (rest of year) to 15.4% in Oct-Dec, a bigger jump than Clothing (11.1% → 13.9%) or Accessories (11.1% → 12.5%). Footwear is being cleared harder every festive season, which compounds its already-thin margin.

Discount Policy Recommendation: Cap promotional discounts at 20% to protect margins. High discounts (>25%) erode an estimated ₹0.57 Cr in potential profit vs a no-discount scenario. Introduce "smart discount" segmentation instead of a blanket %-off.

Q4: STORE PERFORMANCE

Performance Gap: Top stores average ₹0.72 Cr vs bottom stores ₹0.2 Cr - a 72% gap. Bottom stores are concentrated in Tier-2/3 cities with lower footfall and limited brand awareness.

Root Causes & Quick Wins for Underperformers

Tier-2/3 city locations with lower brand visibility

Fix: Hyperlocal digital campaigns

Limited product assortment vs top stores

Fix: Expand fast-moving SKUs

Likely higher staff turnover in smaller markets

Fix: Incentive schemes + training

Lower digital payment adoption

Fix: QR-pay cashback promotions

Q5: CUSTOMER SEGMENTATION & TARGETED STRATEGIES

Returning Customers (56% of transactions)

Profile: Higher transaction share (56%), similar AOV (~₹2,655) to new customers.

Strategy: Reward loyalty instead of discounting: VIP previews, early access, birthday rewards. Recommended discount: ≤10%.

New Customers (40% of transactions)

Profile: ~40% of transactions, average order value ~₹2,639.

Strategy: 15% welcome offer with follow-up push notifications at Day 7, 30, and 60 to drive repeat purchase.

Unclassified / Missing (4% of transactions)

Profile: ~4% of records had missing CustomerType and require data-quality follow-up at POS.

Strategy: Fix data capture at checkout; in the meantime, treat as general audience for broad seasonal campaigns.

STRATEGIC RECOMMENDATIONS

QUICK WINS (0-3 months)

- Launch a "Weekend Flash Sale" every Saturday with an extra discount on trending items
- WhatsApp + SMS campaigns Thu/Fri to drive weekend footfall across all 50 stores
- Introduce a loyalty points program with 2x points on weekends and festive season
- Cap Shoes discounts near 15% to help recover lost margin
- Give bottom-10 stores a targeted hyperlocal ad budget (Google/Meta)

LONG-TERM (3-12 months)

- Build a real-time dashboard tracking KPIs by store, category, and day
- Deploy demand-based replenishment to predict stock needs 4-6 weeks in advance
- Explore a bank partnership for 0% EMI on larger purchases to lift AOV
- Expand Accessories online (highest margin) via app and marketplace channels
- Introduce quarterly store manager performance reviews with P&L accountability
