BUSINESS SCENARIO & OBJECTIVES

Business Scenario GlowUp, a beauty and skincare startup, ran multiple online and offline marketing campaigns across Social Media, Influencer partnerships, Email, and in-person Events over the past 12 months. Management needs to know which campaigns actually paid off, and how to allocate the marketing budget more efficiently going forward.

1

Identify Top Campaigns

Pinpoint which campaigns and channels deliver the strongest conversions and revenue, and which are underperforming.

2

Calculate ROI & CPA

Quantify ROI (%) and Cost per Acquisition for every campaign to compare performance on a like-for-like basis.

3

Recommend Budget Allocation

Translate findings into a concrete next-quarter budget split across channels to maximize revenue per rupee spent.

KEY KPIs TRACKED: Spend • Leads Generated • Conversions • Revenue • ROI (%) • Cost per Acquisition (CPA) • Clicks & Impressions (digital)

Assumptions: Data covers the last 12 months only. $ROI = (Revenue - Spend) / Spend \times 100$. Event campaigns don't track Clicks/Impressions (offline channel); a small number of digital campaigns had missing Click or Impression values, treated as not-collected rather than zero and excluded from engagement-rate averages.

EXECUTIVE DASHBOARD

12-Month Marketing Performance Snapshot | 4 Channels • 28 Campaigns

Revenue Share by Channel

Spend vs Revenue by Channel (₹)

Q1: WHICH CAMPAIGNS DELIVERED THE HIGHEST ROI?

Top 5 Campaigns by ROI

Bottom 5 Campaigns by ROI

Email Dominates ROI

All 5 top-ROI campaigns are Email campaigns - low spend, high existing-customer conversion (VIP Early Access hit 1,733% ROI).

Events Underperform

4 of the 5 lowest-ROI campaigns are Events - high fixed costs (venue, staffing, samples) without matching revenue return.

Q2: WHICH CHANNELS ARE MOST EFFECTIVE?

Conversions & Cost per Acquisition (CPA) by Channel

Conversions by Channel

Cost per Acquisition (₹) by Channel

Email is the efficiency leader:

lowest CPA (₹77) and strong conversion rate (15.7%) — ideal for scaling to existing customers.
Influencer drives the most conversions (1,301) at a moderate CPA (₹499) — the best channel for new-customer volume.
Events carry the highest CPA (₹2,471) by far, driven by venue and staffing costs spread over fewer conversions.

Q3: HIGH LEADS, LOW CONVERSIONS - WHY?

Campaigns that generated strong reach but failed to convert

Conversion Rate: Flagged Campaigns vs. Overall Average

Overall average conversion rate: 12.6% — these campaigns fall to 1.5-4.0%

Campaign Detail

Campaign	Leads	Conv.
Campus Freshers Drive	850	34
Mega Reach Giveaway	3200	48
Free Sample Blitz	2100	63

Likely cause: giveaway/free-sample mechanics attract deal-seekers and students, not genuine skincare buyers - high reach, low purchase intent.

Fix: add a qualifying step (email capture + skin-concern quiz) before entering giveaways, retarget entrants with a small conversion incentive within 7 days, and cap giveaway-style spend at a fixed test budget rather than scaling reach further.

MONTHLY SPEND, REVENUE & ROI TREND

Aug 2025 - Jul 2026

Two clear seasonal peaks:

Aug 2025 (festive pre-season stocking) and Dec 2025 (holiday gifting, driven by a very efficient low-spend Email push) both show outsized revenue relative to spend. Sep 2025 dipped into negative ROI, coinciding with heavier Event spend that month - reinforcing the case to trim Event budget.

NEXT QUARTER BUDGET ALLOCATION

Current Spend Mix vs. Recommended Reallocation

Current Spend Share (%)

Recommended Spend Share (%)

Rationale:
Shift spend out of Events (42.6% → 10% share) into Email (2.3% → 20%) and a modest Influencer increase (34.1% → 40%), with Social Media held near its current level (21.0% → 30%). Events aren't eliminated - a smaller, better-targeted presence still supports brand visibility and sampling, just at a fraction of today's spend.

STRATEGIC RECOMMENDATIONS

QUICK WINS (0-3 months)

- Scale Email campaigns immediately - lowest CPA (₹77) and highest ROI (983%); double send frequency to the existing customer list.
- Add a qualifying quiz/email-capture step before any giveaway to filter deal-seekers from genuine leads.
- Pause or renegotiate the two lowest-ROI Event formats (Pop-Up Bar, Salon Roadshow) until cost structure improves.
- Re-brief Influencer partners toward mid-tier creators with proven conversion history, not just follower count.

LONG-TERM STRATEGIES (3-12 months)

- Build a lightweight CRM segment for post-purchase email flows (birthday, replenishment, VIP) to keep CPA low as volume grows.
- Negotiate event costs down (shared venues, smaller footprint) or shift budget to hyperlocal digital ads with similar local reach.
- Run structured A/B tests on Social Media creative/audience targeting each quarter; retire underperforming formats faster.
- Set a standing quarterly budget-reallocation review tied to ROI and CPA thresholds, not historical spend habits.
